## KLIM Adds Cordura Fabric Technology to Enduro Pants

Email Print Like Tweet

INVISTA announces the adoption of CORDURA fabric in a new apparel line powered by KLIM. CORDURA fabrics are used throughout the collection's premium line of pants specially designed for "enduro" motorcycle riders. CORDURA fabrics are featured in four pant designs – Chinook (pictured), Baja, Dakar and Mojave – and are available in red, blue, orange and gray.

### Sure Sellers:

- CORDURA fabric provides durable protection and mobility, allowing riders to perform at their best
- Gives riders: maximum durability and abrasion resistance, exceptional moisture management performance and enhanced comfort and breathability
- Exceptional strength-to-weight ratio of CORDURA brand fabrics provide the collection with lightweight, high-tenacity fabric functionality to allow riders flexibility and agility in their movement
- The Chinook Pant delivers durability and all day comfort
- Baja Pant provides relief from the unforgiving summer heat
- Engineered with comfort in mind, the Dakar Pant provides zippered vents combined with rider specific patterning
- Mojave Pant is designed to conquer the elements
